

Moisture Resistant Heat Shrink Connectors

Description

These connectors have a polyolefin heat shrink tubing cover with an inner adhesive sealant. When heat is applied and the tubing shrinks, the adhesive flows creating a moisture and corrosion proof connection. Highly resistant to water, solvents, and chemical penetration.

Physical Part Detail

Barrel Type	Closed - Brazed
Insulation	Polyolefin Heat Shrink
Material	Electro-Tin Plated Copper
Termination Interface Style	Crimp or Compression
Operating Temp	-40°F to 230°F (-40°C to 110°C)
Shrink Temperature	212°F (100°C)

Size

Available Wire Gauge: 22 up to 8

Available Stud Size ranges from size 6 to 3/8" (10 to 1/2" stud size for 8 gauge wire)
